## ABSTRACT

A mail survey of vocational-technical teachers in Texas was conducted to identify tasks performed, knowledge required, and amount of time spent in the performance of these tasks. A questionnaire was given to 1,149 vocational-technical teachers with 85 percent responding. The teachers were classified according to vocational program areas and were asked to identify the tasks they performed and the time spent on each of 105 given tasks in the areas of: instructional planning, execution, and evaluation; program planning, development, and evaluation; management; guidance; school-community relations; student vocational organization; professional role and development; and coordination. Data are arranged according to vocational education program areas and a composite analysis of the data across program areas was also performed. Each task was analyzed in the following areas: rank by percent of respondents performing, cumulative sum of average percent time spent by all respondents, average percent time spent by all respondents, average percent time spent by respondents performing, and percent of respondents performing. It was concluded that the respondents could identify the tasks performed and the amount of time required. The research offers useful information for curriculum decision making and developing instructional programs. A bibliography is included and the questionnaire appended. (EC)

## ABSTRACT

This report presents the results of a study designed to first identify tasks typically performed by vocational-technical teachers and secondly, to determine the relative amount of time spent performing these tasks. Seven random samples were drawn from the population of vocational-technical teachers in Texas. The samples corresponded to seven distinct program areas. These areas were: Trade and Industrial Education; Distributive Education; Homemaking; Vocational Office Education; Health; Agriculture Education; and Occupational Orientation. Questionnaire methodology was utilized using an approach developed, validated, and reported by Christal (1) and applied by Lovelace (3). The contents of the questionnaire consisted of 105 tasks and subtasks derived from competencies validated in earlier studies by Pope (4,5). Analyses performed on the data included both individual program analyses and one analysis for the total group of 980 respondents (85 percent of the sample selected).

The results of the study consist of a validated set of tasks and subtasks useful for curriculum decision making in any training program. Not only are the tasks ranked according to the number of vocational-technical teachers in each program area who perform the task, but relative percent of time spent performing the task is also given.

While a great deal of similarity was noted across program areas, very distinct differences were evidenced. This information along with other data are presented in the body of the report.

## PREFACE

The study reported in this document represents the work of many people. One group that devoted many hours to the project was the tasks development committee which had the responsibility of writing tasks and subtasks from the competencies identified in an earlier study. Serving on this panel were: Drs. Linda Keeling, Texas Woman's University; Don Knotts, Prairie View A & M University; Earl H. Knebel, Texas A & M University; Fairchild Carter, North Texas State University; Doyle Holder, North Texas State University; Max Jobe, East Texas State University; Allena Pace, Sam Houston State University; Camille Bell, Texas Tech University; and John Hayes, East Texas State University.

The study would not have been possible without the cooperation of the vocational-technical teachers who responded to the survey instrument. The project director and staff are very much indebted to this group.

Consultants for the project included Drs. E. V. Huffstutler, Professor of Educational Administration; and Earl McCallon, Associate Professor of Educational Research, North Texas State University. Special acknowledgments are due Mr. Wayne Milligan and Mrs. Kay Kienast, research assistants for the project.

Special acknowledgment should be given to Bill E. Lovelace (3) who designed a technique for the separation of identified competencies into tasks and subtasks.

## INTRODUCTION

The research reported in this document grew out of a need to identify tasks actually performed by vocational-technical instructional personnel in Texas and to determine the relative amount of time spent performing each task. This information is very important for decision making where efforts toward the development or modification of curricula are undertaken.

The study revolved around two primary objectives. These were (1) to differentiate tasks and subtasks from competencies identified in earlier studies by Pope (4,5); and (2) to determine the relative amount of time spent on each identified task.

To accomplish these objectives, specific procedures were developed to translate the competencies validated by the earlier studies (mentioned above) into tasks and subtasks. This was done by means of a panel of experts. Once this had been done, appropriate questionnaire methodology was employed to obtain data from a representative sample of vocational-technical teachers in the state.

In doing this, vocational-technical teachers were first stratified into seven program areas. Once this had been done, simple random samples with strata were drawn using a table of random samples. Listed below are the seven program areas and the samples that were drawn.

<u>Program Area</u>	<u>Sample Size</u>
Trade and Industrial Education	200
Distributive Education	200
Homemaking	200
Vocational Office Education	200

<u>Program Area</u>	<u>Sample Size</u>
Health	109
Agriculture Education	200
Occupational Orientation	40

This report presents the information supplied by these vocational-technical instructors.

A careful review of the literature revealed that curricula for teacher education programs are typically developed on the basis of (1) what teachers and teacher educators perceive that teachers should be able to do or know; (2) the relative importance of these perceptions; and (3) hypothesized roles of teachers with no distinction being made between tasks and subtasks. Any curriculum developed to prepare individuals for an occupation should be based on an analysis of that occupation. A complete analysis of an occupation should include both an identification of actual tasks performed and knowledge required, and the relative amount of time spent on each task performed. It was with these considerations in mind that this study was undertaken.

## PLANNING AND MANAGEMENT CONSIDERATIONS

Work on the research project reported in this document was done during the July 1, 1974, through June 30, 1975, time period. Initial planning resulted in the identification of three major phases for the project. These phases represent natural divisions for a discussion of the planning and management procedures followed in the project.

### *Development of Tasks and Subtasks*

#### *Phase I (July 1, 1974 through October 31, 1974)*

During this period of time the competencies identified in the studies by Pope (4,5) were separated into tasks and subtasks. This was done by a nine-member panel of experts. Included on this panel were: Drs. Linda Keeling, Texas Woman's University; Don Knotts, Prairie View A & M University; Earl H. Knebel, Texas A & M University; Fairchild Carter, North Texas State University; Doyle Holder, North Texas State University; Max Jobe, East Texas State University; Allena Pace, Sam Houston State University; Camille Bell, Texas Tech University; and John Hayes, East Texas State University.

The results of the work performed by this group is reflected in the questionnaire (See Appendix A) utilized in the survey. As a final validation procedure, each task contained in the questionnaire was required to have been identified as an appropriate task by at least seven of the nine members on the validation panel.

*Development and Distribution of Survey Instruments*

*Phase II (November 1, 1974 through February 28, 1975)*

During this phase of the project the survey instrument was constructed, pilot tested, and finalized. The samples of vocational-technical instructional personnel were drawn and the instruments printed and mailed. Construction procedures for the questionnaire were in accordance with the developmental work reported by Christal (1).

*Collating and Analysis of Data*

*Phase III (March 1, 1975 through April 30, 1975)*

During this period of time, survey instruments were secured, coded, and prepared for computer analysis. Appropriate statistical programs were written and/or modified to perform the necessary analyses. These computer programs were then tested for accuracy. As a final step, the survey information was processed and the results placed into statistical summary tables.

Response rates from the survey groups were good. Listed below are the sample groups and the rate of return:

<u>Program Area</u>	<u>Return Rate</u>
Trade and Industrial	78%
Distributive Education	82%
Homemaking	89%
Vocational Office Education	87%
Health	75%
Agriculture Education	71%
Occupational Orientation	87%

*Development of Final Report*

*Phase IV (May 1, 1975 through June 30, 1975)*

The final report for the project was written during this period. This involved a final interpretation of the survey data and the preparation of 100 copies of the report for the Division of Occupational Research and Development, Department of Occupational Education and Technology, Texas Education Agency. In addition to the final report, interim project reports were developed by the survey team in accordance with the requirements specified by the project director.

## INSTRUMENT DEVELOPMENT

The survey instrument used a format adapted from job inventory questionnaires utilized by the Department of Defense (1). The instructions were very simple and the method for responding convenient and easy (See Appendix A for a copy of the instrument). The respondents were first asked to check tasks they performed and then to go back and rate (using a seven-point scale) the estimated time spent on the task.

The instrument was comprised of 105 tasks (or subtasks). These tasks had been formulated by a panel of nine experts in the field of vocational-technical instruction. This panel worked from a list of 300 validated competencies that had been identified in studies conducted by Pope (4,5).

The tasks on the survey instrument were divided into ten sections. These were: Instruction: Planning; Instruction: Execution; Instruction: Evaluation; Program Planning, Development, and Evaluation; Management; Guidance; School-Community Relations; Student Vocational Organization; Professional Role and Development; and Coordination.

## DESCRIPTION OF POPULATION

The population for the study consisted of all vocational-technical instructors in the state of Texas. This group was divided into seven subpopulations. These were: Trade and Industrial Education; Distributive Education; Homemaking; Vocational Office Education; Health; Agriculture Education; and Occupational Orientation. Of the 1,149 teachers in the survey 980 (85 percent) returned the survey instrument. Of those responding, 481 (49 percent) were males; 460 (47 percent) were females; and 39 (4 percent) did not indicate their sex.

Table 1 presents the number of respondents by program area. A good representation from each group was obtained. The 47 persons who responded but did not indicate their program area were included in the total group analysis but, of course, excluded in the individual program analyses.

Table 1  
NUMBER OF VOCATIONAL TEACHERS RESPONDING TO  
TASK SURVEY BY PROGRAM AREA

TASK SURVEY BY PROGRAM AREA

Program Area	Frequency
Other	0
Not Reporting	47

Table 2 groups the respondents by age categories. The median age was approximately 40 years. On the whole, the group was rather heterogeneous on this variable.

Table 2

FREQUENCY AND PERCENT OF VOCATIONAL TEACHERS RESPONDING TO  
TASK SURVEY BY AGE CATEGORIES

Categories (Age)	Frequency	Percent
21-24	43	4.39
25-29	174	17.76
30-34	127	12.96
35-39	137	13.98
40-44	130	13.27
45-49	104	10.61
50-54	119	12.14
55-59	59	6.02
60-up	28	2.86
Not Reporting	59	6.02

Tables 3 and 4 depict the respondents with respect to organization and population. Approximately 70 percent were in a preemployment laboratory or shop environment and were classified as regular instructional personnel as opposed to CVAE or handicapped.

Table 3

FREQUENCY AND PERCENT OF VOCATIONAL TEACHERS RESPONDING TO TEST SURVEY BY ORGANIZATION

Organization	Frequency	Percent
Preemployment laboratory or shop	307	31.33
Cooperative Training	425	43.37

Categories	Frequency	Percent
Regular	771	78.67
Coordinated Vocational Academic Education	164	16.73
Handicapped	12	1.22
Other	7	0.71
Not Reporting	26	2.65

Categories for respondents by years of teaching experience are presented in Table 5. Approximately 54 percent of the respondents had nine years or less. Once again, the group was rather evenly distributed over the categories.

Table 5

FREQUENCY AND PERCENT OF VOCATIONAL TEACHERS RESPONDING TO  
TASK SURVEY BY NUMBER OF YEARS TEACHING EXPERIENCE

Years	Frequency	Percent
1-2	134	13.67
3-5	194	19.80
6-9	197	20.10
10-14	158	16.12
15-19	109	11.12
20-up	159	16.22
Not Reporting	29	2.96

With respect to the number of years in present assignment, the respondents indicated approximately 33 percent had been in their present assignment two years or less and about 63 percent five years or less. These data are presented in Table 6.

Table 6

FREQUENCY AND PERCENT OF VOCATIONAL TEACHERS RESPONDING TO  
TASK SURVEY BY NUMBER OF YEARS IN PRESENT ASSIGNMENT

Years	Frequency	Percent
1-2	328	33.47
3-5	288	29.39
6-9	185	18.88
10-14	62	6.33
15-19	32	3.27
20-up	45	4.59
Not Reporting	40	4.08

The respondents were also asked to indicate how much experience they had had in other approved vocational-technical programs. Table 7 presents this summary. Most of the respondents (78 percent) had no other vocational-technical experience. When asked about related vocational experience, almost half (46 percent) indicated none. However, 18 percent indicated three to five years. This information is presented in Table 8.

Table 7

15-19	60	6.12
20-up	67	6.84

Table 9 presents the number of years of occupational experience the respondents had in their present assignment. The respondents clustered into two categories: zero years (27 percent) and three to five years (26 percent).

Table 9

FREQUENCY AND PERCENT OF VOCATIONAL TEACHERS RESPONDING TO  
TASK SURVEY BY NUMBER OF YEARS OCCUPATIONAL  
EXPERIENCE IN PRESENT ASSIGNMENT

Years	Frequency	Percent
0	269	27.45
1-2	97	9.90
3-5	253	25.82
6-9	121	12.35
10-14	77	7.86
15-19	50	5.10
20-up	113	11.53

Two questions on the survey instrument dealt with the highest degree held by the respondents and whether the respondent had either majored or minored in education in obtaining an earned degree. This information is presented in Tables 10 and 11. More than half of the respondents (53 percent) held a baccalaureate degree while 32 percent had completed a master's. Seven percent (7%) had only a high school diploma. This information is found in Table 10. With respect to the major or minor in education question, 71 percent indicated that they had either majored or minored in education on one degree (Table 11).

Considering the fact that about 85 percent of the respondents had a degree (Table 10), it is safe to say that definitely the majority of respondents had majored or minored in education at some point in their college careers.

Table 10

FREQUENCY AND PERCENT OF VOCATIONAL TEACHERS RESPONDING TO  
TASK SURVEY BY HIGHEST DEGREE EARNED

#### DATA COLLECTION PROCEDURE

During the November 1, 1974, through February 28, 1975, time period, questionnaires were mailed to the sample of vocational-technical teachers in the state. This represented a random sample of teachers in each program area. A second questionnaire was mailed to those not responding in the first wave. The respondents were asked to indicate each of the tasks they performed and then to rate the amount of time they spend in performing the task. A space was provided for the respondents to add additional tasks and rate these tasks. No tasks were added, indicating that the 105 tasks included on the instrument apparently covered the tasks typically performed by the teachers.

## STATISTICAL ANALYSIS PROCEDURES

The survey instrument was designed to be keypunched directly from the form. Once the data were reduced to card input, statistical computer programs were written to tabulate the participant data reported in the Description of Population section.

A special computer program was also developed to analyze the information on tasks. This program was designed to (1) count the number of respondents performing each task; (2) calculate the percent of respondents performing a task; (3) determine the average percent of time spent by respondents performing the task; (4) calculate the percent of time spent by all respondents on a given task; (5) indicate the cumulative sum of the average percent of time spent by all respondents on the tasks; and (6) rank the tasks by percent of respondents performing each task.

Once the information had been computed, it was placed into tables to facilitate interpretation. These tables are presented in the next section.

## PRESENTATION AND DISCUSSION OF RESULTS

Two approaches to the analysis of the survey data were utilized.

First, information from the respondents was divided by program area. This produced seven sets of data, corresponding to the following groups: Trade and Industrial Education; Distributive Education; Homemaking; Vocational Office Education; Health; Agriculture Education; and Occupational Orientation. A second approach utilized was to combine across these groups and analyze the data producing composite information.

### Trade and Industrial Education

Table 12 presents the results for the Trade and Industrial Education group of teachers. Among the 105 tasks listed, task number 43, "uphold acceptable standards of student behavior in vocational classrooms and laboratories," was the only task reported performed by 100 percent of the teachers, although 18 tasks were reported performed by 90 percent or more of the teachers. On the other extreme, two tasks were reported as performed by 11 percent or less of the respondents. These tasks were:

96. arrange with a union to make contract provision for student learners.
90. supervise student teachers.

In considering the relative amount of time spent on each task, the teachers reported spending less than two percent of their time on any one task, however, the percent was generally more than one percent. Consequently, the distribution of time over tasks was rectangular.

Table 12

## Analysis of Tasks Performed by Secondary Vocational-Technical Teachers of Trade and Industrial Education.

Task Number	Task	Rank by percent of respondents performing	Cumulative sum of average percent time spent by all respondents	Average percent time spent by all respondents	Average percent time spent by respondents performing	Percent of respondents performing
43.	uphold acceptable standards of student behavior in vocational classrooms and laboratories.	100.0	1.74	1.74	1.74	1

### Distributive Education

Table 13 presents the results obtained from an analysis of responses from the distributive education teachers. Of the 105 tasks, 29 (28 percent) were identified as performed by 90 percent or more of the teachers. This was significantly more than the trade and industrial education group.

Among the distributive education teachers, certain tasks were identified as performed by virtually all the teachers. These included:

53. encourage students to discuss career aspirations (98.8 percent).
54. demonstrate a regard for and an interest in the students as individuals (98.8 percent).
59. present information to students on employment opportunities (98.8 percent).
91. establish criteria for selection of student-learners (98.8 percent).

On the other hand, three tasks were identified as not typically performed by the distributive education teachers. These were:

96. arrange with a union to make contract provision for student-learners (6.1 percent).
90. supervise student teachers (4.9 percent).
41. provide approved safety apparel and devices for vocational students assigned to hazardous equipment (3.7 percent).

Considering the time devoted to tasks, the teachers reported spending more than one but less than two percent on almost all the tasks.

### Homemaking Education

Table 14 contains the results of the analysis performed on the responses from homemaking education teachers. The tasks are ranked according to the percent of respondents reporting they performed the task. Seventeen (16 percent) of the 105 tasks were reported as performed by 90 percent or more of the respondents. The most frequently designated tasks were:

38. prepare purchase request for approved vocational equipment and supplies.
54. demonstrate a regard for and an interest in the students as individuals.

Two tasks were designated as performed less than 8 percent of the time. These were:

24. identify the geographical area in which an occupational survey will be conducted.
96. arrange with a union to make contract provision for student-learners.

As with other groups the homemaking education teachers also indicated a rather even spread of relative time spent on the tasks. Considering only those who reported performing a task, generally more than one but less than two percent of the average teacher's time was spent on any one task.

### Vocational Office Education

Contained in Table 15 are the results of the analysis of vocational office education teacher responses. Twenty-two tasks (21 percent) were evaluated as performed by 90 percent or more of the respondents. The most common tasks designated were:

52. develop constructive working relationships among students.
84. participate in state, district, regional, and national activities of the student vocational organization.

Two tasks were reported as performed by less than three percent of the teachers. These were:

41. provide approved safety apparel and devices for vocational students assigned to hazardous equipment.
96. arrange with a union to make contract provision for student-learners.

### Health Education

Table 16 presents the results of individual task analyses for the health education teachers participating in the survey. This group identified three tasks that all or almost all respondents perform. These were:

43. uphold acceptable standards of student behavior in vocational classrooms and laboratories (100 percent).
53. encourage students to discuss career aspirations (98.9 percent).
84. participate in state, district, regional, and national activities of the student vocational organization (98.9 percent).

Twenty-six of the 105 tasks were evaluated by 90 percent or more of the respondents as a task they perform. These represent about 36 percent of the teachers' time.

As with previous groups, two tasks were reported to be generally not performed by respondents. These were:

41. provide approved safety apparel and devices for vocational students assigned to hazardous equipment.
90. supervise student teachers.

### Agriculture Education

Reported in Table 17 are the analyses for the 105 tasks as evaluated by agriculture education teachers. Two tasks were evaluated as being performed by all respondents. These were:

44. maintain an inventory of vocational tools, supplies, and equipment assigned to the laboratory.
46. arrange for the storage and security of vocational supplies and equipment.

This group evaluated other tasks similar to previously reported groups. One example is the following item which was not reported as performed:

96. arrange with a union to make contract provision for student-learners.

Most of the tasks reported as performed consumed between one and two percent of the respondents' time. This is very similar to other groups.

### Occupational Orientation

The last individual group to be analyzed was the occupational orientation teachers. This group tended to differ from the other groups as reflected by the information in Table 18. There was less agreement on the tasks performed. This is indicated by the fact that only nine tasks were evaluated by 90 percent or more of the respondents as performed. Also eight tasks were evaluated as not performed, an occurrence that was not noted in the other groups.

The average percent of time spent by respondents performing a task also differed from other groups, while other groups generally indicated between one and two percent of their time was devoted to any one task, the occupational orientation teachers indicated more than three percent of their time was devoted to several tasks. Thus, the pattern for this group was few tasks performed with obviously more time devoted to these tasks.

### All Program Areas

The final analysis performed on the vocational-technical teacher data was an analysis of each task using information supplied by all 980 respondents. The extent to which the identified tasks fit the respondents is evidenced by the fact that 47 (45 percent) of the 105 tasks were indicated to be performed by 76 percent or more of the respondents. This information is reported in Table 19. Most of the tasks consumed between one and two percent of the respondent's time (on the average).

The overall analysis points out certain tasks typically performed by teachers regardless of program area. These include:

38. prepare purchase request for approved vocational equipment and supplies .
54. demonstrate a regard for and an interest in the students as individuals .
53. encourage students to discuss career aspirations .
43. uphold acceptable standards of student behavior in vocational classrooms and laboratories .
19. formulate a system of grading consistent with school policy .

Conversely, certain tasks were reported as not performed by a significant number of teachers across program areas. These included:

41. provide approved safety apparel and devices for vocational students assigned to hazardous equipment .
90. supervise student teachers .
24. identify the geographical area in which an occupational survey will be conducted .
96. arrange with a union to make contract provision for student-learners .

## SUMMARY AND CONCLUSIONS

This study reports the results of a survey of 105 tasks identified by a panel of experts as those performed by vocational-technical teachers. The information was obtained from 980 vocational-technical teachers in seven program areas which represented an 85 percent return rate. These areas were: Trade and Industrial Education; Distributive Education; Homemaking; Vocational Office Education; Health; Agriculture Education; and Occupational Orientation. Each task was evaluated in terms of (1) the extent to which it is performed by vocational-technical teachers and (2) the percent of time devoted to the task. Tasks were derived from a set of competencies which had been validated in earlier studies by Pope (4,5). Information was collected by means of a mailed questionnaire.

The data were analyzed in two ways. First, each program area was analyzed separately and secondly, a composite analysis across program areas was performed.

The results indicated that respondents were able to differentiate adequately between tasks performed and not performed and the respondents were able to indicate the relative amount of time spent performing these tasks. This further validates the use of this approach by Christal (1) and Lovelace (3).

Differences, along with a great deal of similarity, were noted among the seven groups. A very logical pattern was exhibited. The greatest difference occurred between the occupational orientation group and the other six categories.

The implications for curriculum development are evident. A great

deal of similarity of content for instructional programs would appear to be in order. Yet very meaningful differences appear to exist.

Overall, this study should provide valuable base line data from which curriculum decisions can be made. In this manner, more effective curricula can be developed and present curricula modified in order to improve effectiveness in the professional development of vocational-technical teachers.

In conclusion, it is recommended that professional preparation of vocational-technical teachers be revised and where needed be developed using similar occupational analysis procedures based on professional tasks performed by practicing vocational-technical teachers.

Furthermore, a study needs to be made to determine the complexity and criticality of each of the 105 tasks studied. Finally, it is recommended that such programs be developed jointly by several universities utilizing the tasks identified by the study. A strong pre- and postassessment model will be essential for any competency-based program and should be an integral part of the validation procedure.

RESEARCH QUESTIONNAIRE

# Texas Education Agency

201 East Eleventh Street  
Austin, Texas

78701

- STATE BOARD OF EDUCATION
- STATE COMMISSIONER OF EDUCATION
- STATE DEPARTMENT OF EDUCATION

February 28, 1975

Dear Fellow Educator:

EPD Consortium D is conducting a Teacher Competency Research Project under the auspices of the Department of Occupational Education and Technology, Texas Education Agency. Part of the statewide study is designed to produce usable data and information concerning competencies which are both common and unique to all vocational-technical personnel in public schools.

I am confident that all educators recognize the need for this kind of information in the context of competency-based teacher education. It is hoped that you will help in this effort by encouraging completion of the questionnaires being sent to vocational-technical personnel in your school.

Your assistance in this study will be appreciated.

Sincerely,

A handwritten signature in cursive ink, appearing to read "John R. Guemple".  
John R. Guemple  
Associate Commissioner for  
Occupational Education and Technology

JRG:al

RETURN BY MARCH 21, 1975

# A SURVEY OF TASKS

## PERFORMED BY VOCATIONAL TEACHERS

Dear Fellow Educator:

The Division of Occupational Education and Development, Texas Education Agency, is sponsoring a study of tasks performed by vocational teachers. The results of the study will be used to assist the program planners in developing speciality descriptions for teaching fields, developing college courses, and implementing inservice activities. Your contribution will be an asset to program development in the area of vocational-technical education. Your assistance is greatly appreciated.

Dr. Billy N. Pope  
Coordinator, EPD Consortium D

RETURN BY MARCH 21, 1975

### GENERAL INSTRUCTIONS

1. Your assistance in completing this survey is very important. Your answers and the answers of other teachers completing this Job Inventory may be used to:
  - a. Write speciality descriptions for your teaching field.
  - b. Develop speciality training standards and college courses for your teaching field.
  - c. Development of inservice activities for upgrading in your teaching field.
2. This Job Inventory is in two sections:
  - a. A Background Information section, where you give information about yourself, and
  - b. A Task List section, where you give information about your current teaching assignment.
3. In providing the information requested, it is important to follow the procedures given.

### INSTRUCTIONS FOR BACKGROUND INFORMATION SECTION

Complete each item in the Background Information section.

(35-39)

READ THIS PAGE BEFORE GOING FURTHER

Have you completed the Background Information section? Make sure, before you continue with this procedure.

PROCEDURE A. CHECKING TASKS OF PRESENT TEACHING ASSIGNMENT

1. As you read each task in the Task section, pages 5 through 11, place a check beside each task that you perform in your present assignment. Put your checkmark in the column headed "Check If Done Now." When you have reached page 11, return to page 5.
2. DO NOT COMPLETE THE RIGHT-HAND COLUMN AT THIS TIME.
3. If a task that you perform is not listed anywhere in the entire list, write it on the last page of the booklet.
4. Do not confuse work you do yourself with work you supervise.
5. Remember, at this time you are to complete only the column headed "Check If Done Now" for pages 5 through 11. Now, turn to page 5 and BEGIN.

PROCEDURE B. RATING TIME SPENT ON TASKS ON PRESENT ASSIGNMENT

1. Have you checked each task that you perform in your present assignment? Make sure, before you continue with this procedure.
2. Now you are to rate the relative amount of time you spend performing each task in your present assignment. Relative time spent means the total time you spend doing the task compared with the time you spend on each of the other tasks of your present assignment during the year.
3. Use a rating of "1" if you spend "very much below average" amount of time on a task. Use a rating of "2" for "below average" time; and so on, up to a rating of "7" if you spend "very much above average" amount of time on the task.
4. Remember, you are to rate only tasks that you have already checked in the first column of pages 5 through 11.
5. Place your rating, according to the seven-point scale, in the right-hand column, headed "Estimated time spent on competencies in your assignment this year."
6. When you have completed all your ratings in the right-hand column of pages 5 through 11, you will have completed this Job Inventory, and you may return it in the enclosed self-addressed, stamped envelope to:

Dr. Billy N. Pope  
P. O. Box 1300  
Richardson, TX 75080

## Secondary Vocational-Technical Instructor's Competency List

		5. Slightly above average
		6. Above average
		7. Very much above average

NOTE: If any task you perform is not listed, write it on the blank page at the end of the booklet.

INSTRUCTION: EVALUATION

17. establish criteria for evaluating student performance.	_____	(56)
18. develop criterion test.	_____	(57)
19. formulate a system of grading consistent with school policy.	_____	(58)
20. appraise students' performance in relation to performance objectives.	_____	(59)
21. evaluate student-learner's work qualities, personal traits, and progress on the job.	_____	(60)
22. devise self-evaluation techniques for use by students.	_____	(61)

PROGRAM PLANNING, DEVELOPMENT, AND EVALUATION

23. organize a steering committee to assist in the pre-planning activities of an occupational survey.	_____	(62)
24. identify the geographical area in which an occupational survey will be conducted.	_____	(63)
25. appoint and involve advisory committee in conducting an occupational survey.	_____	(64)
26. collect occupational data from employers to identify occupational standards.	_____	(65)
27. identify the role and function of the advisory committee.	_____	(66)
28. plan the annual agenda to be considered by the advisory committee.	_____	(67)
29. assist in the identification of the vocational education purposes and objectives for the school.	_____	(68)
30. analyze occupations with assistance of employers and labor representatives.	_____	(69)

(Continued on next page.)

PROGRAM PLANNING, DEVELOPMENT, AND EVALUATION (Continued)

31. identify the competencies needed for entry into an occupation. \_\_\_\_\_ (70)

32. assist in writing general objectives for courses offered in the vocational education program. \_\_\_\_\_ (71)

33. write student performance goals for vocational education courses. \_\_\_\_\_ (72)

34. maintain continual follow-up information on placement, employment, and training status of each graduate of the vocational program. \_\_\_\_\_ (73)

35. disseminate a summary of the vocational education evaluation to administrators, advisory committee members, and the board of education. \_\_\_\_\_ (74)

MANAGEMENT

36. prepare a capital outlay budget proposal for new equipment needed in a vocational course. \_\_\_\_\_ (75)

37. plan an operating budget proposal for consumable supplies, services, and materials needed in a vocational course. \_\_\_\_\_ (76)

38. prepare purchase request for approved vocational equipment and supplies. \_\_\_\_\_ (77)

39. structure a filing system for records and report forms used in a vocational course. \_\_\_\_\_ (78)

40. supply administrators with data for vocational reports required by the state department of education. \_\_\_\_\_ (79)

41. provide approved safety apparel and devices for vocational students assigned to hazardous equipment. \_\_\_\_\_ [1] (80)  
\_\_\_\_\_  
\_\_\_\_\_ (6)

42. maintain a record of safety instruction presented in compliance with safety laws and regulations. \_\_\_\_\_ (7)

43. uphold acceptable standards of student behavior in vocational classrooms and laboratories. \_\_\_\_\_ (8)

44. maintain an inventory of vocational tools, supplies, and equipment assigned to the laboratory. \_\_\_\_\_ (9)

45. establish a system for repairing and servicing tools and equipment in a vocational laboratory. \_\_\_\_\_ (10)

46. arrange for the storage and security of vocational supplies and equipment. \_\_\_\_\_ (11)

47. implement student "check-out" procedures for tools, supplies, and equipment used in the vocational laboratory. \_\_\_\_\_ (12)

48. schedule laboratory equipment for maximum utilization by students. \_\_\_\_\_ (13)

49. direct students in a system for cleaning and maintaining the vocational laboratory. \_\_\_\_\_ (14)

50. arrange layout of vocational laboratory to simulate or duplicate occupational environment. \_\_\_\_\_ (15)

(Continued on next page.)

177

NOTE: If any task you perform is not listed, write it on the blank page at the end of the booklet.

GUIDANCE

51. determine students' background and environment.	_____	(16)
52. develop constructive working relationships among students.	_____	(17)
53. encourage students to discuss career aspirations.	_____	(18)
54. demonstrate a regard for and an interest in the students as individuals.	_____	(19)
55. interpret occupational tests and inventories to students.	_____	(20)
56. assist students in determining ways to best describe their saleable skills.	_____	(21)
57. work with other teachers and counselors to help students with individual problems.	_____	(22)
58. establish communication patterns for exchanging information and for cooperating with the guidance counselor.	_____	(23)
59. present information to students on employment opportunities.	_____	(24)
60. present information to students on post-high school training and educational opportunities available to them.	_____	(25)
61. assist students in securing and in filling out applications for jobs, scholarships, educational loans, or college admission.	_____	(26)

SCHOOL - COMMUNITY RELATIONS

62. provide displays in the school and in the community on the vocational program.	_____	(27)
63. direct student presentations describing activities of the vocational program.	_____	(28)

(Continued on next page.)

SCHOOL - COMMUNITY RELATIONS (Continued)

64. conduct an open house to familiarize members of the school and community with activities of the vocational program. \_\_\_\_\_ (29)

65. sponsor student-parent activities for the vocational program. \_\_\_\_\_ (30)

66. maintain liaison with union officials and employers. \_\_\_\_\_ (31)

67. conduct opinion surveys in the school and community concerning the vocational program. \_\_\_\_\_ (32)

68. analyze enrollment trends to determine student and parent acceptance of the vocational program. \_\_\_\_\_ (33)

69. obtain informal feedback on the vocational program through contacts with individuals in the school and community. \_\_\_\_\_ (34)

70. obtain information from parents relative to their expectations of the vocational program. \_\_\_\_\_ (35)

71. consult advisory committee to obtain information concerning their expectations of the vocational program. \_\_\_\_\_ (36)

72. acquire information from members of the community power structure regarding their expectations of the vocational program. \_\_\_\_\_ (37)

73. assist in planning the overall objectives of the total school program. \_\_\_\_\_ (38)

STUDENT VOCATIONAL ORGANIZATION

74. obtain approval from school administration for establishing a student vocational organization. \_\_\_\_\_ (39)

75. contact state leadership regarding the steps to be followed in organizing a student vocational organization. \_\_\_\_\_ (40)

76. acquaint prospective members and their parents with the purposes, activities, and values of the student vocational organization. \_\_\_\_\_ (41)

77. organize a student committee to assess the interest of students in joining a vocational organization. \_\_\_\_\_ (42)

78. conduct an organizational meeting for a student vocational organization. \_\_\_\_\_ (43)

79. coordinate student vocational organization activities with instructional activities. \_\_\_\_\_ (44)

80. supervise the development of an annual handbook and scrapbook for the student vocational organization. \_\_\_\_\_ (45)

81. maintain a file of publications available for the student vocational organization. \_\_\_\_\_ (46)

82. maintain student vocational organization as integral part of the instructional vocational education program. \_\_\_\_\_ (47)

83. serve as an advisor or judge for district, state, regional, or national student vocational organization contests. \_\_\_\_\_ (48)

84. participate in state, district, regional, and national activities of the student vocational organization. \_\_\_\_\_ (49)
